AutoCAD

Click on image for larger view. History AutoCAD is the sixth commercial CAD application to be released by Autodesk. The first application was AutoCAD 200, the first "desktop" CAD program released in 1982. To encourage sales, Autodesk reduced the price from US\$20,000 to US\$12,500, and the company placed an advertising campaign in trade journals.[4] Click on image for larger view. Originally, AutoCAD

200 was designed as a product for the desktop computer, and could only run on a microcomputer with a graphics controller. The first-generation "SmallTalk" operating system was available on the IBM PC of the time, but it was slow and the machine itself was too expensive. AutoCAD 200 ran on a GE 6600 minicomputer for its first two years. The 6600 was a minicomputer that used "SmallTalk" as an operating system, but was faster than the original IBM PC, and was much less expensive than the first IBM PC. By the end of 1983, there were about 3,000 users using AutoCAD 200. AutoCAD

200 was the first CAD application that allowed users to see in real time what they were drawing. Instead of a graphics terminal, users could type their commands directly into the CAD application, which sent these commands to the machine's graphics controller. AutoCAD 200 was the first CAD program to have a graphical user interface. Prior to AutoCAD 200, most programs did not have a graphical user interface, and instead required users to enter commands via a text editor, which was slower than typing commands directly into the computer.

When AutoCAD 200 was released, it became the first desktop program to run on the IBM PC. Click on image for larger view.

After AutoCAD 200, AutoCAD 200XL,

released in 1985, was the next desktop CAD program. It was designed as a scaled down version of AutoCAD 200, with a different look and feel. It was designed to run on the IBM PC XT and compatible computers with a graphics controller. AutoCAD 200XL supported the XKD file format for storing 2D drawings. AutoCAD 2D was released in 1986, and AutoCAD 2D Architecture in 1989. It is the

with your milk, maple syrup, sugar, vanilla extract and cinnamon. Make sure the pumpkin mixture is cool, then sprinkle the top of it with the chopped pecans and enjoy. A few notes on portioning: If you're trying to lose weight, you may need to cut your portions in half, since you're no longer using the roasted pumpkin. If you're avoiding sugar, you may need to cut your portions in half, since the whipped cream in the recipe is sweetened with maple syrup. If you're trying to avoid heavy ingredients like butter, you may need to cut your portions in half, since butter is a very heavy ingredient. Angeles, said that he's looking for ways to  
"reboot" L.A.'s criminal justice system — not  
only to address mass incarceration in  
California, but to eliminate the cycle of  
"deprivation and despair" that produces  
victims of crime and crime itself. Garcetti  
noted that fewer than 5 percent of people  
involved in gang-related crimes are  
sentenced to prison. "It's clear that we're  
not taking a hard enough stance on that,"  
he said. As mayor of a city with more than a  
million residents, Garcetti's statement was

framed by statistics showing how many people live in L.A. Nearly half of the city's residents are from Latin America, and more than a third are "low-income" people or people of color. Some 53 percent of people arrested in L.A. have no previous felony record. About two-thirds of prisoners are men. Many poor people live in neighborhoods without basic amenities like streetlights, fire hydrants or grocery stores. Crime is rampant. And drugs and guns are a constant. "This is an incredibly combustible mixture," said Garcetti. The circumstances that create those conditions are varied. "It's part of the drug culture," said L.
