It consists of a Customer rating 5 stars 5 Votes 12 Digg this Site Feedback Rating for Corporate Content Management System Please wait... Security: Popular software solutions Multimedia Conversion Suite About our site Windows9download is composed of the following 5 channels, each one with a specific purpose:The Windows Channel,The Linux Channel,The Drivers Channel,The Mobiel Channel.Over 10,000 software free download.Q: How to check if a process already exists? Is there a way to check if a process already exists? I can do it via the command line with this: \$ ps ax | grep nginx But if I want to know if a process already exists without specifying the name? A: You could use the FIFO file object (your proposed grep) and the stdin (stdout) standard file descriptor. A simple example would be: while read line; do [-z "\$line"] && continue : "\$line" done
