LinguaSubtitle Crack is a Java-based, user-friendly application that you can use to generate subtitles for movies based on your own vocabulary. LinguaSubtitle Free Download comes in handy for anyone who wants to learn English while watching their favorite movies. The generated subtitles can be exported to SRT format, which can be used with any media player. Burelius is a Java-based scientific calculator, with an easy-to-use interface, and a help system. It is quite similar to a "Scientific calculator" which are floating window application, like Scientifica, but Burelius is a standalone application and is more a Math helper and a more general calculator. It's main features: - High-precision numbers (scientific notation, nanoseconds, etc) - Exp, log, sqrt, pow, sin, cos, tan, arcsin, arccos, arctan, arccot, arccoth, arccsc, arccscot, arccsch, arccschot, arccothim... - Decimal separators (cents, pennies, pence, dollars, billion, trillion...) - A bunch of other useful functions: factorials, sums, average, format, random number generators, logarithm, exponential, power, etc. It's use is simple. Burelius can be used as a standalone, but most people will use it with Java Swing JApplet, and it can also be used with other environments (e.g. as a console program) Contacts is a Java Swing application to manage your contacts. There is an online version available as well. The goal of this project is to have a full-featured contact manager that can be used both in your computer and in your mobile. With Contacts you can create contacts, search, add notes, etc. and you can share the information with your friends by e-mail, IM or phone. Contacts supports both contact information and notes. It also supports tag searches, views and list. In addition, you can share your contacts list by e-mail. Guitar Pro is a Java-based, cross-platform (Linux, Windows and Mac OS X) application for guitar and bass players. It has the following main features: - Various useful features for guitar players (tempo annotations, chromatic and full pedalboard, metronome

- Add any number of words to the dictionary - Easy selection of the output format - Features words in any order. - Automatic generation of a list of all the words in the dictionary - Separate files for each word - Screenshots of each word - Export/Import of word lists - Subtitle processing for Mac OSX "nunuUNO" iDevices X86 Uno IDE Pro for Mac is a full-featured IDE for Uno development. The IDE contains an editor, comprehensive debugger and much more. Key features: -Full code editor with syntax highlighting -Comprehensive debugger with breakpoints and watch expressions -Watch expressions allow you to watch values of variables -Comprehensive auto-complete -Automatic indentation -Uno development environment -Fully compatible with latest Uno 1.6 Requirements: -Intel based Mac computer with PowerPC CPU -Intel-based Apple computer with PowerPC CPU -nunuUNO 2.1 SDK LinguaSubtitle is a Java-based, user-friendly application that you can use to generate subtitles for movies based on your own vocabulary.
