A: Sounds like you've followed a malicious web page that's injected a JavaScript tag which talks to a tracking server. The tracking server connects to the domain c3aedbfdfa.com/stories/3135850-numer-licencji-automapa-crack-chomikuj-14l-hot. The server sends a 200OK message to that domain, and the hostname of the server is stored on the page. From there, the link points to resources hosted on various domains, some of which host hidden malware. Searching for the domain, you find that domain is hosted on a total of 6 different servers from 2 different countries. I would ignore that directory completely. Infected sites might load such a malicious page by placing it inside a form like: Once a form is submitted, the malicious domain can inject the link and keep track of forms submitted to the site. Q: Как в JSFiddle включить возможность открытия файла в диалогe на вкладке настроек? Использую: Не могу закомментировать код вверху (или внизу) и открыть возможность открытия файлов. A: В JS Fiddle у вас это не открывается, видимо. 1cb139a0ed
