## RadiusCat Crack With Key

RadiusCat 2022 Crack is a useful Remote Authentication Dial-In User Service (RADIUS) billing software application specifically designed for Quintum Tenor VoIP switches. RadiusCat receives and processes RADIUS authentication, authorization, and accounting requests from an unlimited number of Quintum VoIP Tenor devices and sends RADIUS responses back to the Quintum Tenor VoIP client. The Quintum Tenor sends Access-Request packets to the RadiusCat Server where the Access-Request packets are processed to determine whether the caller is allowed access to services hosted by the Quintum Tenor device. The RadiusCat Server makes a determination based on account information that you have defined for that caller on the RadiusCat Server. After processing the Access-Request packet RadiusCat Server sends either an Access-Accept or an Access-Reject packet back to the Quintum Tenor device. The Quintum Tenor device in the case of an Access-Reject packet either, disconnects the caller or gives the caller another chance to enter account information (this is based on the settings on your Quintum Tenor device). In the case of an Access-Accept packet the Quintum Tenor device either places the call and connects the user or sends another Access-Request message back to the RadiusCat Server where more information is provided for processing. At this stage the RadiusCat Server processes the request and either sends another Access-Accept or Access-Reject packet back to the Quintum Tenor device. The Quintum Tenor device will either place the call and connect the caller or disconnect the call. For a successful authorization and authentication when the call is ended the Quintum Tenor device sends an Accounting-Request packet to the RadiusCat Server. RadiusCat processes the Accounting-Request packet and uses the information to update the callers account with billing information. Here are some key features of "RadiusCat":

- ☑ Define PostPaid, ANI PostPaid, PrePaid or ANI PrePaid account types
- ☑ Define full featured Customer Accounts to be assigned to card accounts if required
- ☑ Define full featured Agent accounts to be assigned to card account batches
- ☑ Generate single or unlimited random Pins between 6 and 18 digits long
- ☑ Export Card Account details including PINS to be sent to printer for card printing
- ☑ Define unlimited ANI callers for Card Accounts
- ☑ Define additional charges per call such as Maintenance
