DOWNLOAD

DVDforger is a DVD authoring program that creates DVDs from almost any type of video files (if the necessary codecs are installed). It is a GUI for a set of free tools including: [?] Aften - An AC3 audio encoder. [?] AviSynth - A video frameserver. [?] BMP2PNG - An image converter. [?] Decomb - A video deinterlacer. [?] dvdauthor - A DVD authoring utility. [?] HC Encoder - An MPEG-2 video encoder. [?] MediaInfo - A media analyzer. [?] mplex from MJPEG Tools - An MPEG multiplexer. [?] mkisofs - An ISO image builder (the executable is from here). [?] QuEnc - Another MPEG-2 encoder. [?] WAVI - An audio track extractor You can download DVDforger, try it out and if you like it you can buy it, you can even send us your money at mplex@slaphead.org and we will send you a license code so that you can create your own DVD movies with a GUI like this one. The best way to understand how to use DVDforger is to check the handbook, especially the chapter about using the image, sound and text menus (you will need to understand the basics of the CDDA-DAI standard and the GUI does not explain that). How to create a video CD? How to burn a video CD? If you want to burn a Video CD, you should know how the CDDA-DAI standard works. The CDDA-DAI is a standard to define the hierarchy of multimedia data on a disc, so the layout and the format of the CD-DA is something like this: 0. 0.5 1. 2.

3. 4. 5. 6. 7. CDDA-DAI is a standard for multilingual video CD, and most of the players or burn
