The Tale of the Elden Ring, a Fantasy Action RPG, is a multilayered story told in fragments. The game is a dangerous world in the Lands Between, a new world where the Elden, the original inhabitants, are still alive. The youth of the Elden face the challenges of life and lose themselves in the Land of Oblivion. The story begins on a snowy night when a character, an adventurer, suddenly finds herself transported into the Lands Between. The adventurer, who is trapped in the Mysterious Ring, is the captive of a formidable robber named Ringdroprin. The adventurer is invited to embark on a journey of redemption with Ringdroprin and her captor, Droprin. Together they set out from the stolen land of the Elden on their mission to free the abducted elf maiden, the Winter Princess. A group of hostile creatures, called the Ophidians, and an army of rogues, called the Dremons, stand in their way. There is a legend of a treacherous elf who once abducted and stole the princess of the Elden. Now, as the adventurer and the elf maiden navigate through this dangerous world, they will each have their own story to overcome, their own destiny to make, and their own path to take. Meanwhile, the wounded folk of the Elden will rally in the cold dark. A burning flame of hope emerges within them—a rallying force that will convince the oppressed folk of the power of the Elden. Thus, the story unfolds at the same time for the three separate characters. The saga of the Elden Ring is a fantasy action RPG in the vein of modern day visual novels, with a story written in a visual novel form. It is the product of a collaboration between the fantasy RPG inspired developers at Compile Heart and a novel-developing team of Compile Heart. COMMUNITY ELDEN RING: BY ARGOSPYERLEC Vancouver Police Department says it needs more resources to deal with the high cost of missing women and the disproportionate number of cases involving youth. The annual report from the department, which was released at a community meeting in Kitsilano, deals with an increase in both missing

women and missing children cases over the last year. The report noted that, even by Canadian standards, the city of Vancouver is having a hard time dealing with the cost of missing women. "While some missing women and missing children cases end well, unfortunately for us we're a large city and we have a large number of cases," said Vancouver police chief Adam Palmer. Many of these cases are involving Aboriginal women. Palmer says there's been a rise in Canadian fugitives fleeing for fear of arrest. There is also, he says, an increase in U.S. fugitives that are charging across the border to avoid arrest, and simply disappear. Missing women and children are also being targeted by human traffickers. Often, these human traffickers are parents who need a stable income so they will commit these kinds of crimes. "You will see them in particular in the international missing women and missing children category which is our most expensive cases," said Palmer. 'No place to hide' Police are also concerned about the proliferation of information technology that's being used to prey on and sell people's personal information. Police are looking at measures to identify gaps in security where criminals can access the most personal information and sell it. "Our biggest challenge is to ensure that no place on the internet is safe from the security vulnerabilities of criminals," said Palmer. "We're focusing on our criminal organizations and that's what we're seeing in Vancouver at this point in time." The report also shows that Vancouver police agencies are working together on both the number and nature of incidents. There have been no major crimes that have happened while the Olympic and Paralympic Games have been in Vancouver so far. Vancouver police are also working closely with the RCMP. # Trend Micro Community ## @TrendMicroCenter
