Nomads of the Fallen Star is an upcoming 4X, 4A, 4PC, turn-based 4X space strategy game set in the galactic Wild West. It is inspired by early game-design pioneers such as Chris Crawford and Sid Meier, but takes the additional step of adding an overarching narrative experience to this highly strategic universe. Theme: The Lost Colonists: A starship carrying a colonist fleet on a long voyage crash lands on a distant uncharted & hostile planet. The colonists have lost contact with the home-world and must now survive. Criteria: Fantastic Original: A procedural 2.5D sandbox in which choices matter. The Lost Colonists is a game where you must take the role of a leader of a colony of lost colonists on a distant uncharted world. Your goal is to survive and thrive as a colony, as well as collect resources to build your self-sufficient community. Researching the history of your situation, and unraveling the mysteries of the lost colony will make the journey easier. You must set out to build an expedition to find what clues you can in order to learn what happened to the colony. As a leader, you are faced with many choices. Should you bring up a robotic scout that will check out nearby resources? Should you focus more on harvesting resources and building your infrastructure, or should you go out and fight for control of your neighbor's outpost? But some choices, while feasible, may have adverse consequences. Being the leader means being a demigod, having an almost unlimited influence on the future of your community. But while you may listen to the wishes of your community and work towards their goals, your choices carry consequences that echo over the generations. "The Lost Colonists: Through the eyes of the player, it is a journey across the solar system, uncovering the mysteries behind the lost colonists, and observing a new world being built." Technology: 4X, 4A, 4PC, turn-based 4X space strategy game High level of Focus: A heavily procedural 2.5D sandbox, in which choices matter. The Lost Colonists is a game where you must take the role of a leader of a colony of lost colonists on a distant uncharted world. Forsaken Realms: Vahrin's Call

BroodStar is a cinematic shoot 'em up in the style of classics such as Space Invaders and Asteroids. The player controls a mighty starship and must fight to survive on a hostile planet. The player starts off with a small 'upgrade' module, which is used to collect research points. With each level, the player gets points allowing them to collect items that are necessary for the next upgrade. This offers a depth of choice in progression. Many items can be found at the end of each level. The main goal is to reach the finish line, defeating the boss of the level. Gameplay is split into levels where enemies are randomly generated. Each level starts with a small set of modules but as the player progresses, they can collect a larger set. Awards: Indie Game Developer Contest 2018: 2nd Place Winner «Indie DB Stars » Video Game Awards 2018: Best Indie Game Developed with Unity, C#, and Mono for Mac, BroodStar is available for Windows, Mac, Linux and Android. Insomniac - Remaster A mysterious and deadly parasite has infected a small town in the Mojave desert. The only survivors are two children, a boy named Jim and a girl named Kelly. The only thing the two kids know is that the parasite is somehow connected to the Carcosa Formation which sits a few kilometers away. They must collect items and use them to cure the parasite within 24 hours. Can the children make it and survive? This game can be played in the Google Play store for free, or on Steam for a discounted price. Publisher: Auctus Released: Nov 12, 2018 Unlockable Content: * Game + Soundtrack * Wallpaper and Soundtrack Guardian: Renewed Guardian: Renewed is a top down strategy puzzle game set in the idyllic city of Salisbury. The player will assume control of a Guardian standing atop a tower of a gas main. They must climb to the top of the tower and safely deposit a gas tank to prevent it from bursting, endangering the city. The gameplay is endless with no levels or bosses, so the player can take their time to complete the puzzle. The player is able to choose between two different levels of difficulty, a one-man battle against multiple enemies, or a two-man battle against one enemy. , Kaiji, Battle Royale, Onisama, Ghost in the Shell, .hack //New World, Yo-kai Watch, The Tatami Galaxy, Time Bokan 24, Summer Wars, A Drunken Dream, Gantz.cc List of genres: Action Adventure Comedy Fantasy Horror Mystery Martial Arts Drama Romance Sci-Fi Snowboard Anime Martial Art Musical Short Feature Kaiji is a movie about the hunting of Tetsuo by a man named Kaiji. The movie director, Takashi Miike (who is not in the movie), first became famous when he filmed a fight scene from Fist of Legend by Bruce Lee and edited it such that it became a surreal, surrealistic fight. This pursuit of Tetsuo is also what at the end of the movie, Kaiji is out to pursue. In the film's history, the production company struggled with the way the movie should be viewed, whether it should be seen as an action film, a sequel, or a rare genre film exploring the mystery of the mind, a film about madness, or a film about forgiveness. Many people said Kaiji should not be called a "action film" but rather a philosophical film. This was even expressed by most of the major actors. After it became a dramatic horror movie, the film became the most expensive film in all of the world, surpassing the yearly budget of The Matrix. It was the biggest grossing horror film of all time, I believe. Some people commented about the subliminal message in the film that is somehow connected to American films such as Marathon Man or The Exorcist, as in "revenge is just a dream." "System Requirements: Windows 98 or later Windows XP or later 512MB RAM or more 256MB RAM or more 1024x768 resolution or more 2GB or more of free space for installation" Generalized second-order kinetics for steady-state oxygen isotope fractionation during a temperature-dependence reaction. Rapid solid-state oxygen isotope fractionation of pyrolysis products generated by a temperature-dependence reaction between pyrolytic water and solid char/soot was investigated over a temperature range of 600-1000 °C and under relatively fast gas-flow conditions. The oxygen isotope fractionation is quantified by the temperature-dependence constant ($k(T)$) between the equilibrium [$D(equi)$] and the current [$D(eff)$] temperatures of oxygen isotopes. The observed $k(T)$ values are described by generalized second-order kinetics (GSK) and are found to be comparable to those predicted by traditional first-order kinetics (FK) if the equilibrium temperature is low enough. Based on measured $k(T)$ values, we found the following. (1) The value of $k(T)$ typically decreases in a step-wise manner from 200 °C to 550 °C and thereafter it increases continuously up to about 800 °C, with a slope of about 1.74 ± 0.02 per 100 °C. The stepwise changes at high-temperature range suggest the appearance of multiple reaction sites on the char/soot surface that appear to compete with each other. (2) We found that an unusually large H(2)O-to-C ratio in a pyrolytic char sample is associated with a high $k(T)$, which indicates that a char/soot sample with a lower H(2)O-to-C ratio will have a lower $k(T)$. This observation is consistent with the role that surface heterogeneity plays in facilitating solid-state oxygen isotope fractionation. We also compare the measured $k(T)$ values with those from the literature and find that the values from the two different experimental setups (i.e., temperature-gradient reactor vs. molten-calcite bath) are comparable.
