Gibbous is an atmospheric first person, point and click adventure, written by Christophe Valda (Deadlight, Guacamelee), with a lot of love for old school adventures, Lovecraftian horror, and the golden age of point and click gaming. Set in the 19th century, Gibbous

features classic Lovecraftian story tropes, set in the rural backwater of Maryland, which was an industrial wasteland in the 19th century, as the industrial revolution shifted from coal to steam, and electricity. The player is Will Pinter, a former FBI agent, who is returning to his home town after a 25 year absence. After an accident, Will is transported into the body of his younger self, and a conspiracy of horror is about to unfold. Your biggest decision in the game is to decide whether to take on Will's role, or choose not to, and step out of the way. It's up to you if your desire to not die will be enough to save the world. It was in my youngest son's bedtime story books that I was first introduced to the weird and crazy Mythos. I guess I can say I have been in love with the Mythos since then. One day, out of the blue, I contacted the creator of The Thing on Earth, Corey Jubb, to ask for a blessing for the geeks of the world to play a free RPG inspired by his work. Little did I know he is a gamer himself and started creating the Gibbous RPG with his buddies! I could not have asked for a more enthusiastic and knowledgeable collaborator than him. I created this world and had to think of some plot, a big

theme, characters, and more! I hope I captured the essence of such a wonderful world, environment, and style you're about to enter. I hope you have an experience like it! - Brian M." Story

The Gibbous universe is a cold and dark one. Glaciers encircle a single magical island with lush forests and undulating hills. The land which looks

What's new in Gibbous - A Cthulhu Adventure Artbook:

is now on sale for £8.99, regular price £12.99 and the unlocked demo version £1.99. Murder Most Foul is our demo, now that's gone you can purchase the full game. When developing Gibbous, we took a lot of pains to ensure that a greater percentage of the game is designed to be played on a touchscreen device. As touched screens are not necessarily more expensive than non-touched screens, we were able to achieve quite a new experience with Gibbous. The game's content is much richer (and more enjoyable!) as a result. Murder Most Foul does have a lot of secrets and Easter Eggs, so feel free to look around and perhaps enjoy what you find! The Cthulhu universe, brilliant... Came across a few strange stuff in this one as well - isolated references to Lovecraft, and the insane and deranged oddness of Thalassa. Nice stuff. All in all a great release from Van Batavia Games and is always a nice tune to pull on the punter's attention if you know what I mean! You can play it when you have. :P We want people to realize they can play it all the time. :D God... So many people are tied down by having to understand everything the other party is doing, otherwise they'd be able to focus on the actual play... I mean, simple damage. :P Translator, damage... YES!!! Even WoD (Blood in the Water) does this... so does Bayonetta... (I dunno. Could be coincidence,

but that does work.) I like that, though, in that it actually - does not matter. :D It means I can get myself focused on what's important, and say "the rest is detail!" in my head. Enjoy! Or not. :P You mean we get a narrator... :P I suppose it makes more sense considering, well you know, they are spooky things after all! But yeah, the narrative is really nice and easy to understand, so much so that I forgot it was there at times. :D Take him out! And you reap the rewards! (Easier said than done of course.) Awesome! :D Indeed. :P This is close enough to HD that we don't need to use "high definition", as the folks in our world call "high clarity"! :D Are you
