Field of the Invention The present invention relates to a sheet processing apparatus for processing

sheets, such as cut sheets, and an image forming apparatus including the sheet processing apparatus. 2. Description of the Related Art In an image forming apparatus, such as a color copying machine, such as an electro-photographic copying machine, a digital copying machine, or the like, an image is formed on a recording sheet by an image forming process of fixing an unfixed image transferred on a recording sheet. The image forming process of fixing includes processes such as a pre-fixing process of heating a recording sheet to soften the recording sheet, a fixing process of heating the recording sheet to a predetermined temperature, a post-fixing process of cooling the recording sheet, and the like. The image forming apparatus further includes a sheet processing apparatus, such as a post-processing apparatus or the like, disposed on an upstream side of the image forming apparatus. The sheet processing apparatus may be configured

to be disposed on the downstream side of the image forming apparatus to discharge an output recording sheet on which the image is formed into the post-processing apparatus, or may be separately provided to be attached to the image forming apparatus. The post-processing apparatus includes a sorting apparatus for sorting the recording sheet on which an image is formed, a staple processor, such as a stapler, for stapling a plurality of the recording sheets, a punching apparatus, such as a hole puncher, for punching holes for binding, a saddle stitch or the like. The apparatus further includes a finisher as a post-processing apparatus, as an example of the sheet processing apparatus, that performs finisher processes such as a punching process of punching an unnecessary portion, a surface staining process of st
