Story I'm going to be a little bit more lenient this time. My experience with these titles has been, for the most part, bad. You start off where you usually do, getting some tutorial-style info. You've got three main NPC's who provide context, and after you do a certain quest the game gives you free reign. You're just walking and talking like a hero. You begin to get quests from NPC's as usual, as well as a few from the main questline. Gameplay-wise, it's entirely what I expected. Everything runs and looks great. There's a camera angle you can manually select, and you can rotate the camera clockwise and counterclockwise, but that's about it. There's no in-depth and dynamic combat system like in SAO. Some of the attacks have effects, but not many. Even when fighting a boss, you can only toggle auto/manual attacks, and then that's it. Up to four characters, but very few skills. At most there's healing, and a skill that increases your hit points. But overall, the combat isn't as tough as I was expecting. Having said that, there is one major issue that I didn't expect from MMO's. All of them take an incredibly long time to log in. I'll clarify what I buff6bb2d33
