VIRTUAL SOLDIERS is a casual arcade style shoot 'em up with multiplayer coop and solo mode, designed for 1 to 2 players. You'll be able to kill time as you fight your way through 6 levels filled with enemies and obstacles. The game will be loaded with easy to master gameplay mechanics while containing different weapons from an elemental standpoint to give you unlimited possibilities on how to play the game and fully customize your kill-streak. You'll be able to upgrade your weapons with new resistances and special bonuses. How to Play: A simple click-one-to-kill-one! game. You'll play through 6 levels by clocking the clock and shooting the red dots in the level and killing the enemies on their way to the end. You'll have two separate weapons with different attack modes to choose from: the Elemental Weapon and the Armor Weapon. The elemental weapon focuses on damaging enemies using 1 of 6 different elements (Fire, Lightning, Ice, Thunder, Shadow, Time) and the Armor Weapon does the same thing but damages enemies using individual enemies themselves to kill them. The game features different difficulties (Easy, Normal, Hard, Ultra Hard) with increasing enemy or weapon speed and health to give you an enjoyable challenge to master. Requirements: We've all played shoot 'em ups right? So this game should be easy to play but still give you that feeling of challenge while giving you the satisfaction of achievement as you progress through the levels. ## **What's new:**

**The origins of the subject and genre of this essay first emerged in Paris in the early 1990's from the exploits of the most powerful mobster in France at the time: Georges "Scarface" Gravier. In its own way a Parisian classic, the story of Georges Gravier is as fascinating a portrait of a city as the great American urban novelists; it resembles not only Dashiell Hammett's *The Maltese Falcon*, but Philip Marlowe's *The Continental Op* as well. The style ranges from the *Sunday Times* best seller by way of the *Sunday Telegraph*, to *Paris Match*, *Maison Compilation*, *St-Maurice Le Figaro*, *Goteborg Ny Tidning*, *Le Point*, and so on. With their gangsters gangster on gangster plotlines transcended to make Las Vegas into a crime movie. The original French take on the subject is called *Les Travailleurs de la Legion d'Honneur* aka "The Translations of the Legion of Honor" The English translation isn't as immediate though. The eyes are drawn to the French "JC" and "C" and the word "honor" and what happens on page 420 is the sudden appearance of the term *Legionnaire*. In a nutshell, the *Legionnaire* gets hit with a blow to the head, is rendered bloody, regains consciousness, then remembers everything. The original novella was written in the late 1930's, as (of**

course) was Marlowe's *The Continental Op*. It was sold to a French publisher called Editions Marine, then later released by a Franco-German publisher named Stock and banned for a time in Germany because of its glorification of crime. Eventually Leipsic/Stock successfully turned it into a semi-successful big screen thriller called *War*. I'd recommend that if you like crime/gangster fiction. For my part, in the French original, the two very different mobsters in the story, Scarface and Pozzi, might just be brothers. In any event, Pozzi is a post-war veteran who likes violent sports, and he's totally pals with Scarface. The plot takes place in the 60's, and in the end the mob shows up again in the 1970s in order to eliminate the head of a rival crime family Roger Vadim and Christian Marquand were the French filmmakers who brought the book to cinemas in 1961 and then again in
