Install notes 8.5.3 mail client quick & easy quick install guide. "IBM Lotus Notes. Barriers to decision-making among advanced cancer patients with cognitive impairments. To examine the influence of patient cognitive impairments on the process of decision-making regarding treatment. Cross-sectional, correlational. Oncology inpatient unit at an urban cancer center.

93 patients with advanced cancer and cognitive impairments. Subjects completed the Reasons for Hospitalization Tool to identify barriers to decision-making and the Mini-Mental State Examination to assess cognitive status. Seventy-one subjects used the tool. Mean Mini-Mental State Examination score was 27.6. Subject mean age was 60 years. Forty-eight subjects (57.8%) were women. The mean score for barriers to decision-making was 39.1. No relationship existed between the amount of decisional support provided and the total number of barriers present ($P=.531$). Multivariate analysis identified the domains of financial and decisional capacity as unique predictors of barriers to decision-making. Although there was no relationship between cognitive status and the amount of decisional support provided, decisional support was associated with fewer barriers to decision-making. Findings emphasize the importance of identifying early on the barriers that prevent patients with cognitive impairments from receiving their own preferred care. Q: Rails/ActiveRecord class method for finding fields of an object I have a class method that returns me all fields of an object. How do I modify it so that it can give me only fields of an object that are not nil? Thanks. # Is it possible to do it like this?

```
def all_fields(object) fields = [] object.respond_to?(:all_fields)? object.all_fields : object.instance_variables.keys end # An example of
```
