License: Free Platform: Mac OS X, Windows Downloads: 1,276,994 3 Jul 28 NiteFlirt Downloads: 1,208,946 3.40 MB Privacy-friendly Facebook chat application, keeps your messages safe The question of privacy remains a highly relevant issue when browsing social networks. If you've ever used Facebook chat, you've noticed that the service takes great care to preserve your privacy. In the event that you'd like to bring a similar level of security to your online communications, NiteFlirt is a safe bet. Getting started This is a free app. It's a Facebook chat client. As such, you can install it onto your computer and start chatting away with anyone registered on the same account. You can also import your existing Facebook chat accounts, or create a new one from the get-go. You won't be bothered with a lot of ads. You'll be prompted to give permissions to Facebook when you set up the app, but there's no additional overhead. However, don't expect to join the conversation without a registered account. NiteFlirt is a Facebook chat service, and it's primarily for use with Facebook. There are three sections at the top of the app. The left panel displays all of your chat history. You can filter the messages that show up in the main interface by popularity, date, or a message category, for example. The friends list will show up in the center pane, along with your profile picture. The right panel contains a window that's separate from the main interface. It's here that you can control your settings such as whether to show your real name and your location when you login. It's easy to switch between all three areas. For example, you can bring the friends list into the main interface by selecting the friends list button. Similarly, you can load your chat log by clicking the "History" button. The settings window can be accessed by clicking the gear icon in the top right corner of the main interface. There are other ways to
