For example, it allows users to develop a 'vintage' color palette from a selection of Abstract patterns, earthy earth tones or a gorgeous collection of delicate tints of yellow, orange and red. A new feature allows consumers to omit basic image-editing steps by letting them go straight to editing and sharing from within the browser. Users can share, view, manipulate and save their photos right from within the web browser of the device itself without ever leaving the site. The findings are certainly useful, but with such a wide range of uses for photosharing, describing it as a simple "photo-sharing app" is very narrow.
