The software application is generally used for 2D and 3D modelling and drafting purposes. It can be used for laying out commercial buildings, factories, houses, bridges and similar designs. The AutoCAD software package is very powerful. However, it does have a steep learning curve, and can be slow to start and use. What does AutoCAD do? AutoCAD creates three-dimensional models for designing, detailing and construction. The application is used for manufacturing building designs, detailed architectural designs and layout designs. It is used in numerous industry sectors including, architecture, engineering, construction, manufacturing, health care and utilities. AutoCAD software can work in the traditional 2D drafting mode, or work on a 3D model that can be viewed from multiple angles. AutoCAD software has a number of built-in functions that enhance and automate various CAD tasks and operations. AutoCAD is designed to help users working in various industry sectors and design, build, and modify conceptual drawings. With a low-cost license, AutoCAD can be used to create conceptually designed models for presentations, or directly modified and/or built upon for production work. 3D Studio MAX 3D Studio Pro Architectural Design In the World of Architecture Design and Construction (WOAD), it's used to make a 3D model of buildings and infrastructure. Architects and other design professionals use 3D modeling software to create a 3D model of the site. They can manipulate models to plan, view, and annotate 3D models. They can also export 3D files for use by construction managers, engineers, contractors, and other design professionals. Building information modeling (BIM) CAD (Computer-aided design) Geo-spatial Geographic Information Systems (GIS) Landscape Architecture Landscape modeling Multi-criteria analysis Multidimensional scaling (MDS) Modeling Ortho design Drafting and design Drafting is the act of marking a drawing, or plan, with the tool marks (drafting tools) to indicate measurements. The elements of a drawing are typically sketched in their final, finished appearance, or "as drawn" (also known as "as built"), and not at an earlier stage of design development, and for many years these drawings were made on paper and later transferred to a computer. Today, technical drawing software is widely used to produce detailed drawings by modifying the appearance of existing drawings. These include plans, elevations, section, perspective views, and details and definitions. It is a type of modeling used by architects and interior designers and commonly employed in architectural design. It can also be applied in civil engineering, architectural engineering, landscape architecture, geospatial or other engineering disciplines. It is also used in construction for

estimating, construction management, job control and scheduling, project planning and construction documentation. Construction Construction is the process of building a structure, such as ca3bfb1094

After months of uncertainty, the US Army and US Air Force decided not to renew their lease agreements with the city of Savannah, Georgia. This means that the shuttered Naval Air Station is losing its contract with both branches of the US military. The lease at the base, which has been closed since 2009, has come to an end after the military decided it would not renew. The move was first reported by the Washington Post and The Guardian. "While the base has been closed for several years, the city and the military worked out a modified lease which allowed the city to remain in a steady state of readiness while they made a decision about whether to extend it," former Savannah mayor Otis Johnson told CNN. "The decision was made that it made the most sense to not extend it." Johnson said the US military has owned and used the base since 1899. "It was an important source of jobs in the area, but unfortunately it has not been in operation for quite a few years," Johnson said. "And the need for it has gone down. The services wanted to make a decision that would make the most sense for the future of the base." The Naval Air Station
