Players will be able to get even more out of FIFA Ultimate Team with new kits and transfer updates. New kits and upgrades are available in the shop, and the update will introduce the ability to customise game difficulty in several key areas, such as the ball physics, goalkeepers movement, animations and ball type. New kits available in the shop include Chelsea's 2012-13 home kit and its short sleeve, and Manchester City's 2012-13 home and away kits. The kits can also be further customised by adding custom crest and sponsor graphics. FIFA Ultimate Team Transfer Update Individual player attributes can now be quickly updated, and new offers are available to be claimed, such as limited time free agent offers, seasonal sales and more. Our goal is to give players the most authentic football experience possible. As such, we have introduced several improvements to the gameplay of FIFA Ultimate Team, to make the game more challenging when playing with larger squads. While Goalkeepers have historically been more vulnerable than other players, we are introducing a new goalkeepers animation to make it easier to check if a shot is going to deflect or not. The corresponding animation will be shown when players move towards the ball and after the ball is kicked. We are also introducing a new low-body collision with the goalpost, which prevents the goalkeeper from blocking the ball with their knee. Last, but certainly not least, the ball physics have been improved to make kickoffs and direct shots less common. The ball behaves more like a real football, with decreased rising, increased movement during direct shots, and increased control after a shot. These changes result in many more shots that are directed and accurate - we've had many players ask us if we are the same development team that made FIFA 16! These changes are only the beginning of our further player improvements in FIFA Ultimate Team. We'll continue to work on developing the game to make gameplay as authentic and rewarding as possible. For all the latest information about FIFA Ultimate Team and our roadmap, keep an eye on our website and official news channel. FIFA Football is a series of association football video games produced by EA Sports. The first game, FIFA Football, was released in October 1993. The game is widely credited as a key factor that turned around the flagging popularity of the sport in many countries. It remains the best-selling football game series, and the most widely sold sports video game series of all time. FIFA Online, formerly FIFA Soccer, was an online service for the FIFA series of games. The service launched in September 1999. The service was made available for the PlayStation 2 and Xbox, and required a valid subscription to FIFA Online (FIFA 2001) for access. The game delivers the massive scale of World Cup, UEFA Champions League and professional clubs, all-new play styles, player features, and gameplay innovations that bring the excitement of the real thing into your living room. Key Gameplay Improvements Balancing “It’s a week in which a lot of people are getting off their backsides and starting to get back into the game,” said Richard Jolly, VP of Product Development at EA SPORTS. “I think we’ve really got players excited now, and the community’s started to come back, but obviously you never stop improving on the game. This year we’ve got three key elements that will allow us to address the core of the game, such as balance, a new goal model, new controls and more. We’ve also got a number of new additions, from the updated dribbling engine through to the first ever FIFA Ultimate Team cards, so there’s a lot going on this year.” Genuine Player Features “Being able to give players tools for authentic gameplay and an understanding of the game at a deeper level will appeal to more and more people,” explained John Newbigging, Executive Producer at EA SPORTS. “The Academy system, for example, has been a huge hit, in fact we’re now rolling it out on the PC version, with live training sessions. That allows players to get more bang for their buck in the game. “We’ve also got a lot of attention being paid to the different type of players. This year we’ll take our learnings from the first FIFA game, apply it to our new and improved gameplay engine and have
