FIFA 22 has been fully reworked to make it feel more fluid and fun. Four brand-new control schemes will also be available for users: the physical, simplified, classic and game-changer controls. By inputting your player ID and selecting the control scheme which best suits you, you can use the game’s intuitive controls to play FIFA 22 the way you want. The physical control scheme allows users to play using traditional analog control sticks. The simplified control scheme allows users to play using various buttons. The classic control scheme allows users to play using the same buttons used during FIFA 21, with the addition of a secondary “directional pad.” The game-changer control scheme allows users to play using the same buttons as used during FIFA 21, but with an analogue stick placed in the secondary position, which allows players to still use various FIFA tricks by tapping the stick. The game-changer control scheme gives you the freedom to play a more authentic, more fluid game, all while being completely customizable. The game-changer control scheme also allows users to play with the same buttons as the simplified control scheme, but with the addition of a secondary “directional pad” that mimics the traditional directional pad of a PlayStation controller, for those who prefer to play the game with the physical method. Five game modes are included in FIFA 22, including the traditional 5v5, 4v4 and 3v3 modes, plus a new Fan mode where users can share in the emotion of the game like never before. During matches, users can still move their players around the pitch by using the new “play” function on the left analog stick, which allows you to perform attacks and build-up phases more naturally, and will help to give players more freedom in tactical play. For those who prefer a more action-heavy experience, the return of Supersonic Speed Goal Rush can be enjoyed in FIFA 22, which gives users the opportunity to experience goals like never before. When a goal is scored, the stadium around the goal becomes the “goal square,” and if your player manages to successfully dribble into that area, you will instantly hear a realistic amount of noise come from the crowd. Once the goal is scored, players can freely play wherever they want on the pitch, as they choose. FIFA 22’s new “on-ball action

What's new in Fifa 22:

- **Authentic motion capture (“Mocap”). This allows for the most lifelike animations in football ever captured on a console. Even be it for players running on the pitch, running off the pitch or exchanging two passes. Players on the pitch not only breathe, but also run based on the actual forces that the players run under.**
- **Real-world ball physics. FIFA 22 uses the exact physics model used by the real-world ball so that FIFA movements and ball movement feel seamless.**
- **Creation engine. The creation engine of FIFA has been revamped to give you more control, a new feature called Motion Catcher allows players to create a player and their unique talents.**
- **New Pro Player GK interaction. Shoot and fake saves, dummies, and make points galore. Goalkeepers have new interactive tools at their disposal to truly feel as if they are right on the action.**
- **Real-world Physically based Damage System, transitioning players to the floor when they’re knocked out in the head, discovering new ways to injury your opponent, and feeling the impact and impact on the ground along with your opponent. Also, more realistic versions of blowable head and face shots.**
