Smallville (Int'l: smallville) is an American television series based on the DC Comics character Superman, originally airing on CBS in the United States. The series consists of the first 13 seasons, and is the longest running and highest-rated television series to depict the exploits of Superman. The series originally aired on the ABC network from 2001–2011. In 2011, the series moved to The CW, and in 2012, the network was renamed to The CW. Smallville ended its run on The CW on September 10, 2015. The show consists of 646 episodes. In that time span, 26 million people tuned in for its debut episode, and more than 200 million people total have watched all or part of Smallville. Yvan Wick completely redesigned the visual branding for season 12, starting with the introduction of a new corporate logo. But instead of focusing on quality and unity, Wick prefers to build his identity from a specific style on the design. And something that stands out are the page numbers, a staple of the comic series and a symbol of its potential longevity. A superhero never dies. Gone are the days of the old "60s" look and neon colors. And the new Smallville comes with a new logo, a new corporate identity, and a look that's unpretentious, personal, and contemporary. A visual identity is much more than a logo. It's how a brand wants to be perceived. And it shouldn't be just a gut instinct. Branding professionals understand the way consumer understand the world we live in. Not just in terms of graphic identity, but also product development, packaging and even merchandise to support a specific business like coffee or beer. Everything

is produced by the game publisher Acquire, who most recently brought Max Payne 3 to the DS. The game will be published in North America by Sony and not Acquire, so perhaps the game that starts with NOX as its abbreviation might be a more Sony-centric title than the one that starts with 'MAC'. The game's description follows. [Dateline] June 2005 Monster Pits Across The World Go Missing. Based On Horrible Reports From Scientists In The Field. One Hollow Laboratory. A Thrilling Hellish Locale. A Sharp-Dressed Clown. Horrifying Results. An Unidentified Outrage! No one's quite sure what's going on, but whatever happened to all the pits in the world? In their place appear creepy, unattractive creatures from another dimension. The truth behind their sudden appearance is shrouded in mystery - no one has any idea how they even got here. Was this attack launched by an unknown enemy, or was it a mistake made by a mad genius? No matter what the cause, the carnage in the pits is unimaginable - hundreds of monsters are on the loose, slashing and shredding their way through all kinds of monsters. Nothing, no one, is safe from the scything fury of the monster! ...but keep calm. The GM is here to help you make the right move. More monsters are coming. We have taken steps to make certain of that. The speed and skill with which they do so is worrying enough... It's a race to see who gets there first - Monsterpit Wars, Go Battle It Out! - but despite all the dangers, the most menacing sight is that of a huge rare monster lurking in the dark, waiting to attack. Don't let it get you! No matter how menacing it appears, there's no substitute for good tactics in Monsterpit Battles - gain the upper hand by filtering your moves and tactics to find the right way of going. Whether you're playing monsterpit go-head-to-head with another monster-hunter, or using Monsterpit Cards in your attempts to become No.1, every move you make is critical in the search for victory. Monsterpit Wars is here... As you explore the pits in Monsterpit Wars, you will find new items such as equipment and food. Some items are more useful to certain characters than others.
