The story begins with the curious inventor Gino Cubot, who is fascinated with puzzles that challenge the mind. He makes a cube which he names "Cubot". Many people are able to solve it, but Cubot's puzzle is impossible for even the most astute mind to solve. Cubot doesn't give up, he keeps trying, and continues designing more puzzles. After many years of development, Cubot finally creates a puzzle which will prove to be the ultimate puzzle, and which will require the rare and unique gift of a certain set of skills. Players will have to use all of these skills and abilities to enter the palace room and free the Cubot puzzle from its icy prison. Game Features: Puzzle and Adventure mechanics that will keep you captivated. Endless levels of brain-teasing puzzles. Challenge your friends to win and see who can take down the best high score. Special Gamer's Features: • Unique graphics and animations • Classic Puzzle game mechanics • Replay system (to try different solutions) • Achievements Features supported by Google Play Games: • Leaderboards • Achievements The game is currently only available in English, Spanish, Portuguese, Italian and Dutch, although the game will also be available in French. The language that the game will be released in will be automatically decided by Google's servers, based on the IP address of the player. This is a League of Legends Free-to-Play Browser game which based on the Multiplayer Online Battle Arenas (MOBA). The game is free to play, however some game items can be purchase using real money.
