1. Go in Tank! ► By pressing Key (Caps Lock key), It's simple. You can use only your left hand and it also easy. If you can see it simple, but it's really because you try. After all, You can operate the tank freely. Even when you have no gun, you are still in a tank. And, You are a tank! 2. Mission Trying to make a tank with the limitless nature game. I can't make a game that contains the usual story, so I'd like to make a game that is about the life of a tank. The action is only a simple tank that travels through the world. And, I believe that's fun. 3. Game Features There is an end point! Finish every mission to reach the end. If you miss the end, it will be a game over. You will be restarted to the game start point. There are 3 tank models: - Vehicle Type: 120mm Gun Tank: Japanese Type - the machine used to operate tanks is versatile! What can it be? - Not any tank! ■ Operation. You can operate the tank freely, so you can do whatever you want. Your aim is to destroy enemy tanks by shooting them. It's easy right? The enemy tanks will start their auto running, so chase them carefully. Do not go out of the tank! Operate like that and you'll get 3 stars. And, 5 stars give you special effects. Follow the update regularly. ■ Toybox It's great to enjoy the game in an original way. You can customize the toybox freely. If you can do anything that you want, if you can make a toybox. But what is the ability of the tank? - It's maybe the ability of the tank? If you win, You can make a toybox? You can do anything you want. You can create anything. ☆ I will be updating! Please report bugs. ☆ Come visit us in our booth at Gamer's Road!!! ◆ Creator, VCNO or VOXEL TANK VR ----- Original soundtrack : * Mechaabnormal

What I want to achieve is to loop through these bytes and change them to hexa-values. For that purpose, I tried with following way: public void HexChange(byte[] bytes) { } Where a constructor is: public Byte(params byte[] src) { _c = (int)src[0]; _c2 = (int)src[1]; _d = (int)src[2]; _e = (int)src[3]; _f = (int)src[4]; _g = (int)src[5]; _h = (int)src[6]; _i = (int)src[7]; } But the _c is always 0 and same is the case for other _c as well. Any solution/input to achieve this is highly appreciated. A: The jagged array constructor will probably work for you, but you may need to explicitly enumerate the array

A hauntingly compelling game by System Shock creator Ken Levine, Night in the Woods is a tale of murder, grief and infidelity, set in a beautiful, yet heartbreakingly absurdist world of monsters and weird weather. In this coming-of-age adventure, you play Mae, an 18-year-old graduate who's struggling to hold it together. One day, when Mae leaves her college for a job, something terrible happens, leaving her mother dead and throwing Mae's life into chaos. Written by renowned indie game developer and lyricist Scott Benson, Night in the Woods won the Special Recognition for Narrative from the Independent Games Festival in 2015, was named Game of the Year by multiple publications, and was named Editor's Choice by The A.V. Club. Just a little bit more about me: I'm a college dropout who's game has been praised by critics and adored by fans. I live in a beautiful town in southern California with my wife, baby boy, and twenty-six guinea pigs. I'm independent and I love discovering the stories behind the games I love and creating games of my own. I specialize in games with strong stories, often mixing comedy with tragic moments, in lush worlds where making a choice can have major consequences. A little about how the game works: The first chapter of the game (Mae's story) is told in a semi-linear fashion, but it's very straightforward; it's simply a matter of progress through the game world. So this is a good place to start if you're a fan of linear games. The second chapter (Mae's mother's story) is told through her journal entries, and you're almost entirely free to determine how to proceed. As you play, conversations with various characters will reveal bits of backstory about the town of Possum Springs, the events of the past chapter, the people you've met, and more. The third chapter (Mae's story) is your story; no walking down a predetermined path, and it all begins at the very beginning. The world you play in is inherently open-ended, but there are a number of side quests to accomplish that can involve things like uncovering secrets, investigating oddities, and fighting monsters. Thanks for the heads up! We'll be replacing the previous low-res version with a new, higher res, version in the next day or two, so any help is appreciated :) We hope to see you guys at the PSP launch! - Robb I would love to see a demo for this on the PlayStation Store. I recently played Final Fantasy 15 and enjoyed it quite a bit. Not as in depth as Xenoblade Chronicles or the Grand Theft Auto series, but great atmosphere and I'd love to see that kind of game for the Vita. As for PS4: I feel so old right now :(Where does this table come from? Edit: it's likely the "schema" is a cube. Anyone want to beta test a new flash hack-n-slash game I just wrote? It's very different from my usual style, so the only things I'd be testing would be sound and level design. I've had this idea about an advent calendar for the Vita. I know that it's really easy to get lost when exploring PSP homebrew, so I've thought about having a little "adventure" with each day being a small and separate game. (Also, I'm starting to get in the mood for some MGS1-3, I think.) I'm looking for beta testers and suggestions on which games would be suitable for this type of experience. As for PS4: Is anyone else looking forward to the launch of The Last of Us Part 2? Warby thetoys are great! My favorite mini war figures are the Claymore series and some of the Cog mini figures. @Daven - Thanks for the recommendation! There are a lot of anime studios in Tokyo that make top quality things. I think I have at least 3 (including Sumomo, Mami Kuri, and Goronson). Anyone have a partial list of the upcoming PSP games? Or just games they'd like to see? Robb says: @lomolomolo - We've sent the link on to the mod team, we're still waiting for the fixes to be applied. Wow I'd love to know which screencaps are based on photos of real-life figures and which ones are in the style of the game. :) Haven't heard much about Goemon yet. I am

Wednesday, January 29, 2009 Tuesday, January 28, 2009 The other day I was browsing through the more than 100 fantasy novels in my office. Yes, these are books I'm writing, though I'm not so sure I'm finished yet. I've got them all sitting around. The titles are: Monday, January 13, 2009 Its been a while since I've been able to do a decent blog. We've had our baby boy, he still does a happy dance. But its been a crazy busy time. I am all "inner zen" right now, not entirely sure what that means other than I'm in a good place, I'm a little more peaceful than normal. I found this post today on Max Powers' blog. I discovered her when I was doing some research on how to keep awake while you're writing. It's a great post and some nice thoughts. She has three wonderful fans, so I'll recommend each of her books too (in case you haven't yet gotten around to reading them). She would totally rock as an avatar to write on this blog, I think she'd enjoy it. In the twentieth century the world was sick, sick of the games played on them and the world collapsed. In a flash it went back to the way it was, and things were violent and terrible. People were forced to live in tribal bands, marauding and robbing, and for a time the world was all ash and evil. There were three men against the world, well, they were a group, and three was the magic number. Who are you, you ask? I'll tell you. I am The Gentleman's Mistress, a very wicked werewolf, a testament to the human desire for perversion and damnation. How else do you think I manage to survive being half alive and being held hostage by the dark forces of the world? The author was born in the late 70's. His debut fantasy novel was published in 1996 by Orbit, and then came his mystery novel, and book one of his immortal trilogy, The Gentleman's Mistress in 1997. His second book, Blood Music, co-written with husband Duncan Falconer, was published in 2001. His series has sold well over 200,000 copies. Most people who read his books love them and others rant and rave. Myself, I'm happy to rave about them. Friday, November 28
