By 1996, when AutoCAD R14 was released, Microsoft Windows 95 was the predominant platform for AutoCAD, as microcomputers were out of production and the IBM mainframes were obsolete. Since then, the application has been ported to a variety of platforms, including the Palm PDA, iPhone, and Android. AutoCAD LT/2010 (or 2010 for short) was released in December 1989 and was the first version of AutoCAD that ran on PC's and microcomputers with internal graphics controllers. It was originally marketed as a low-cost desktop version of AutoCAD, but was soon acknowledged by many industry analysts as the fastest, most sophisticated CAD application available on the market. It was also used to write both technical and non-technical data, such as scientific manuscripts, letterheads, and design drawings. The first version of AutoCAD used a graphical user interface (GUI) on MS-DOS, Windows, or OS/2. Like AutoCAD LT (2010), AutoCAD 2016 (or 2016 for short) was released as a desktop application running on PC's with internal graphics controllers. Doreen Carltable, who runs the Carltable Tea Shop, was planning a busy day when she opened her doors for the first time in the New Year. "It was a bit of a drenching so it was just a case of getting everything cleaned up. I was a bit worried because the rain was still coming down, but the next day the garden was really flooded and some of my plants got very wet," she said. "It was a bit of a shock. I'd had a full day's business before and when I went out the next morning it was like a different place." The New Plymouth District Council's flood damage team cleaned up the shop a few hours later, but it was too late. "The washing machine went round to my house to clean everything up and they took it away. They didn't say anything about taking any tea, so I hope someone else finds it." Her business was closed for the rest of the week, and Ms Carltable will have to see how long the tea is still drinkable before she can buy new stock. "I don't know if I'll be able to get it. I was pretty gutted because I lost a whole week's business. "It's just a disaster. I couldn't believe it, it's such a nice place to come and do business. It was looking so tidy and ready for business. I just really

feel like I've lost a whole week."The af5dca3d97

In breast cancer, nuclear receptor coactivators function to modulate and integrate hormone action in normal breast epithelia. Although the receptors, which have yet to be identified, are all members of the steroid receptor superfamily, the coactivators appear to have limited tissue-specificity. Breast tumor cells have been shown to have elevated levels of AIB1, a recently cloned member of the p160 family of coactivators. Previous work has indicated that AIB1 is overexpressed in a variety of breast tumor cell lines, and that in the absence of AIB1, ERalpha is down-regulated, estrogens are not able to stimulate proliferation, and estradiol does not have a mitogenic effect. In this study, we demonstrate that silencing AIB1 by small interfering RNA in a hormone-responsive breast cancer cell line leads to inhibition of cell growth and proliferation, consistent with its role as a coactivator. This reduction in cell growth is further enhanced in the presence of tamoxifen, suggesting that the two treatments act through separate pathways. Furthermore, while tamoxifen inhibits the growth of other cancer cells, the opposite is true for the breast cancer cell line MCF-7. Finally, we show that AIB1 is overexpressed in primary breast tumors, and that AIB1 overexpression is associated with decreased overall and disease-free survival, suggesting a role for AIB1 as a potential prognostic marker and therapeutic target.Q: ActiveRecord: Can't cast String to String I'm using ActiveRecord and have this error when I run rake db:m
