Bounty Contract Weeks can be found in the "Weekly Activities" tab in the Bazaar. Upon completion, the contract key will be available for all other players, and a message will be sent out to other players telling them of the contract. [207] Players who accept a contract are automatically given a number of credits to spend on bounties, which are stored in the "Bounty Credit" tab of the Importers' Guild Fleet. [297] Players may then purchase a bounty contract key through the Bazaar, which they then must be able to redeem within three days to complete the contract. The purchase options differ depending on the bounty contract, but usually include one of the following: a

week of game time; a modification to the contract; a bounty; an assassination mission; a work order; a contract key; or "All of the above." [297] Over one million subscribers registered in the first three days following The Old Republic's release, and over a million had begun to play The Old Republic by December 26, making it the fastest-growing subscription MMORPG in history. The Old Republic has received generally positive reviews from critics, with a score of 85 on the review aggregation website Metacritic, though it has received some criticism by players for the lack of late-game content, which has led the game's developers to focus on the addition of upper-level content in many of their updates. Due to declining subscription numbers during the summer of 2012, The Old Republic introduced a Free-to-Play option in November 2012, and the game's first digital expansion, Rise of the Hutt Cartel, was released in April 2013. The Old Republic has received several dozens major content updates so far, and the second Digital Expansion, Galactic Starfighter, was released to free-to-play users in February 2014. Galactic

Starfighter was released to active subscribers on December 3, 2013, and was released to Preferred Status players on January 14. A third Digital Expansion, Galactic Strongholds, was released in August 2014, and a fourth expansion, Shadow of Revan, was released on December 9. With the next two digital expansions: Knights of the Fallen Empire (October 27, 2015), and Knights of the Eternal Throne (December 2, 2016), the game took a narrative twist, focusing on a new faction, the Eternal Empire. On April 13, 2019, it was announced that a seventh expansion would be coming to the game, titled Onslaught. Onslaught was released on October 22, 2019.

The Old Republic: House of the Jedi was released on December 10, 2013 with Game Update 2.4. Though the patch contained no new content, it was intended to improve the game's stability and performance for players. The update also included two new option screens, one that allowed players to opt out of the Cartel Coins event, and the other that allowed players who had the "experience return bonus" applied to their account (a system that automatically increases the experience gained from missions to 3.25x the normal rate) to have the bonus replaced with Cartel Coins. Players who had the "treasure return bonus" active (a system that automatically increases the amount of credits received from treasure chests) were also able to have the bonus removed. [30] The Rebel Assault Trooper class is the primary ranged class for the Rebel faction, and utilizes a variety of sniper-style weaponry. These players initially choose between a Human,

Mirialan, Mandalorian, and Zabrak before the release of Update 1.2, and the two advanced classes for the Trooper are the Vanguard and the Commando. Vanguard players are classified as Ranged Tanks or Close-Quarters Damage, and are equipped with sniper rifles, melee weapons, and shield generators. Commando players are classified as either Ranged Damage or Healer, and they carry assault rifles as their primary weapon. The two advanced classes share the Assault Specialist skill tree, which teaches the use of explosives and grenades, and the Commando's Tactics and Shield Specialist trees deal with close-range combat and shielding respectively. For the Vanguard, the Combat Medic tree boosts healing abilities, and the Gunnery tree aids in maximizing the damage dealt by rifles and power bombs. The Rebel Trooper class's five companions are Ace, Anakin Solo, Emperor Palpatine, Hondo Ohnaka, and Jango Fett. [55] 5ec8ef588b
