· A fast and simple tool to download multiple images from multiple websites at once. · All supported website formats: HTML, PHP, ASP, CSS, XML, JPG, GIF, BMP, PNG, TIFF. · A unique feature called MACRO which allows you to store URLs in a file and automatically download all images at once. · No need to login to a website to download images. · Search engine friendly. · Auto-save download links in a text file. · Supports multiple output formats: BMP, JPG, GIF, PNG, TIFF. · Edit websites and set a specific website URL to download with one click. · Supports authentication for password protected websites. · Ability to select desired pictures with search bar. · Works great as a Chrome extension. · Support website video (Flash, HTML5, SWF, etc.) too. Web Pictures Downloader from MACROplogic Downloading pictures from the Internet is obviously a two-click job thanks to today's advanced browsers, but Web Pictures Downloader is an app that promises to make everything a lot faster, especially when it is necessary to grab multiple pictures as quickly as possible. Efficient image downloader that can save you a lot of time The actual purpose of this particular application is to help you download the photos published on a specific website with a single click, rather than by taking them one at a time. This makes everything a breeze especially when trying to download photo galleries, regardless of the websites they're published on. Features a minimalistic user interface that may take some getting used to Web Pictures Downloader has a simple interface, although beginners might need some time to figure out how to use the program. In essence, writing down the website URL and hitting the "Start to download" button should do the job, with a few options at your disposal to download either only the thumbnails or the large photos. Offers a host of advanced configuration options that experienced users can take advantage of The options screen is the one that requires more attention because it holds a great amount of features, including configurable settings concerning the output folder and the picture names, thumbnails, search, connection and authentication for password-protected websites. Web Pictures Downloader can download only JPG and GIF pictures, which is actually one of the drawbacks when it comes to the overall downloading process. Otherwise, it completes the job in no time, 2edc1e01e8
